Hoosier Heartland RC&D  
5995 Lakeside Blvd., #B  
Indianapolis, IN 46278-1996

Make copies as needed.

*Hoosier Heartland RC&D and its partnering organizations are equal opportunity program providers and employers.*

# Program Highlights

8:00 to 8:30

Registration

8:30 to 8:40

Welcome and Introductions

*Clean Water Through Regulation* – Representatives from IDEM will discuss the past and current water quality regulations, review the Phase II Stormwater Quality program and provide a sense of long term goals for the State's waters.

*Clean Water Through Better Planning* – Two land developers will discuss the process they went through to plan residential and commercial sites. Their insights will help you better plan and design projects that utilize existing topography, available natural resources, and innovative practices.

*Clean Water Through BMP Selection*– Rain gardens, wetlands, dry detention basins and grass swales are stormwater practices that can slow the rate of runoff, improve ground water infiltration and filter the pollutants from urban runoff. . Learn when and where these practices should be installed and how to design them so they function properly.

Lunch Break

*Site Design for Clean Water* – A brief discussion will lead to an actual site design. Participants will work in groups to develop innovative site plans that address stormwater quality and quantity issues.

Break

*Plan Review* - After the break, plans will be selected to be reviewed and critiqued.

*Considerations for Short and Long Term Maintenance* - Maintenance of vegetative practices is critical for their proper function. What practices should be maintained by the homeowner and which ones should be addressed by the municipal agency? This topic will be presented by a land developer and a municipal operator.

4:15– 4:30 Closing Remarks

## Directions

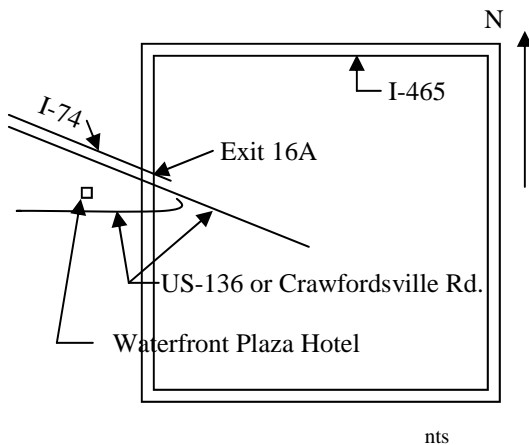

Workshop Location:

### Clarion Waterfront Plaza Hotel

2930 Waterfront Pkwy West Drive  
Indianapolis, IN  
Ph- 317-299-8400
